

## Gomoku Game User Manual

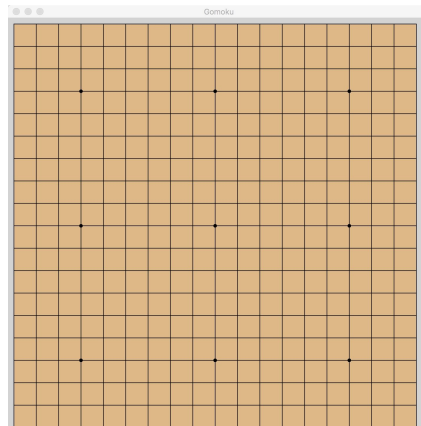

To start and play the Gomoku game, please follow the steps below:

1. Open the GomokuGame.java file, hit “run”, you will be prompted to choose a game mode: Human vs Human, Computer vs Human, Random vs Human

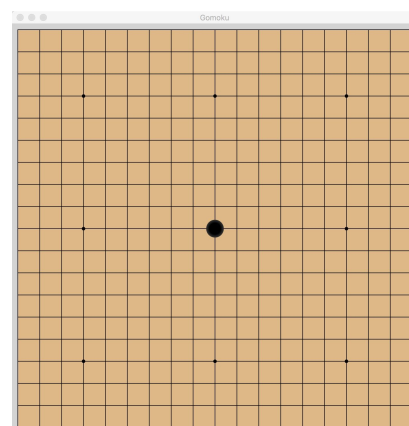

*prompt to get you started*

2. When you choose a game mode, the gomoku chess board will show. If it is empty, you are supposed to take the first turn, click on the spot where you wish to put your first pawn. Black pawn always takes the first turn.

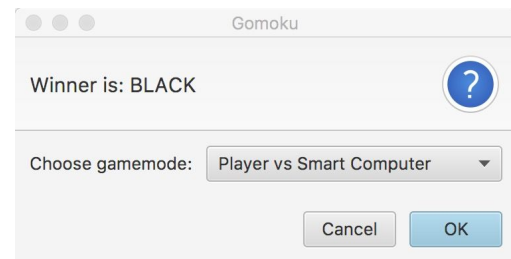

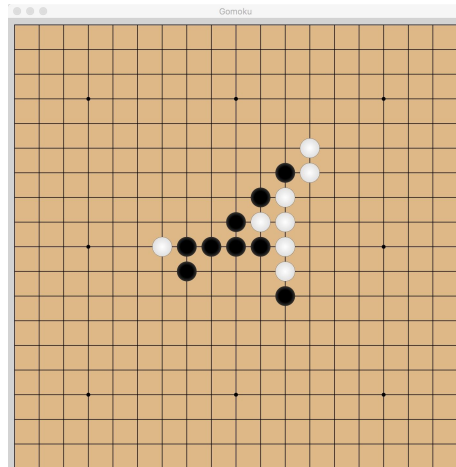

*black gomoku chess board*

*placed a first pawn*

3. If you are choosing Human vs Computer or Human vs Random, your opponent will automatically place pawns on the board, if you are choosing Human vs Human, you and your opponent will take turns to place pawns using mouse click
4. If you or your opponent has 5 pawns in a row, the program will declare winner and you can choose mode again and restart a new game

*black player won the game*

5. You can choose mode and restart the game
6. If you wish to quit the game, simple click cancel or/and click the exit button on the upper left of your window (Mac).
